INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Initial actions included conducting a review of water well databases to identify water wells within a 1/2 mile of the location and preparing a scope of work for the assessment of the former drilling pit.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

After the remediation activities have been completed, soil samples will be collected from the same areas of the former drilling pit where EC & SAR concentrations in soil <3' below ground surface exceeded Table 910-1 screening levels during site characterization soil sampling.

Proposed Groundwater Sampling

☐ Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? (Number, analyses, and locations of samples):

REMEDIAL ACTION PLAN

Does this Supplemental Form 27A include changes to a previously approved Remedial Action Plan? No _____

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

Waste remaining in place meets Table 910-1 screening levels and/or criteria described in COGCC 2008 Rulemaking Frequently Asked Questions (#32) related to depth of clean cover with the exception of EC & SAR in B4, B5, B6, B7 & B8.

REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Remediation of EC in soil less than 3' bgs in the areas surrounding B4, B5, B6, B7 & B8 will be accomplished by surface application of a calcium soil amendment (gypsum). The proposed remediation schedule calls for soil amendment application during the month of October with attainment of EC & SAR concentrations less than Table 910-1 screening levels in 18 to 24 months verified by soil sample collection and laboratory analysis.

RECLAMATION PLAN

RECLAMATION PLANNING

Describe reclamation plan. Discuss existing and new grade recontouring; method and testing of compaction alleviation; and reseeding program, including location of new seed, seed mix and noxious weed prevention. Attach diagram or drawing.

The GP-16 location is currently in interim reclamation status. The soil amendment application will likely cause disturbance to the existing vegetation in the areas of soil borings B4, B5, B6, B7 & B8. The areas will be re-seeded with a dryland pasture grass mix by hand broadcasting after application of gypsum. The location will continue to be included in Kinder Morgan's noxious weed prevention program.

Is the described reclamation complete? No _____

☐ Interim? ☐ Final?

Did the Surface Owner approve the seed mix? No _____

If NO, does the seed mix comply with local soil conservation district recommendations? Yes _____
