Operator Comments:

Confluence has moved the Production Facilities from the south edge of the pad to the north due to topographical reasons. This will require no additional surface disturbance and will not place the Production Facilities within 1,000' of any Building Unit. All wells and facilities are still outside of the Buffer Zone. Attached are revised Construction Drawings and Location Drawing

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
