Jeff,

I have reviewed the referenced Form 2A Oil & Gas Location Assessment and have the following comment.

In the Water Resources section Mallard Exploration has indicated the estimated depth to groundwater is 136 feet. During my review I identified a water well (Permit #292560), that while a little further away to the northeast, has a listed depth to water of 52 feet. I think this depth is more indicative of how shallow groundwater can be in the area of this proposed Oil & Gas Location. Therefore, I would like to change the estimated depth to groundwater from 136 feet to 52 feet.

Please respond to this correspondence by October 28, 2017. If you have any questions, please contact me. Thank you.

Doug Andrews

Morning Doug,

Per your comment below, please go ahead and change the depth to groundwater to 52 feet. Thank you for your guidance.

Respectfully,
