## OPERATOR COMMENTS AND SUBMITTAL

Comments

Distance from completed portion of the proposed wellbore to nearest completed portion of offset wellbore permitted or completed in the same formation was measured to the proposed Marr 0780 5-6H31, to be operated by SandRidge. Distance from the proposed wellbore to nearest existing or proposed wellbore belonging to another operator, including plugged well was measured to the Peterson 1, API No. 05-057-06195, operated by Saket Petroleum Corporation.

The cultural distances vary from the approved Form 2A, Location ID 413754, because a well was previously drilled on the wellpad. The cultural distanced in this filing are the updated distances from this well.

Please contact the undersigned with any questions or concerns regarding this APD.

Thank you.

## Best Management Practices

<u>No</u>	<u>BMP/COA Type</u>	<u>Description</u>
1	Drilling/Completion Operations	The first well on this wellpad was logged with an open-hole Resistivity Log and Gamma Ray Log from the kick-off point into the surface casing. All wells on the pad will have a cement bond log with gamma-ray run on production casing (or on intermediate casing if production liner is run) into the surface casing. The horizontal portion of every well will be logged with a measured-while-drilling gamma-ray log. The Form 5, Completion Report, for each well on the pad will list all logs run and have those logs attached. The Form 5 for a well without open-hole logs shall clearly state "No open-hole logs were run. The Hebron 02-07H, API No. 05-057-06499, was previously drilled and open-hole logs were run in this well".
