INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

A site inspection was conducted to assess the quantities of impacted soil and plan for final closure of the skim pit, evaporation pit, and tank battery.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

Confirmation samples will be collected from all four walls and the bottom of both the skim pit and evaporation pit, plus impacted areas at the tank battery and separator areas. In addition, confirmation samples will be collected from beneath the former berms surrounding the skim pit and evaporation pit.

Proposed Groundwater Sampling

☐ Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? (Number, analyses, and locations of samples):

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

Excess oil will be removed from the skim pit. The metal cage will be removed and recycled. Impacted soils beneath the skim pit and evaporation pit will be excavated and transported to the Clean Harbors Last Chance landfill for disposal.

REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Final site closure will be conducted. In addition to closure of the pits, all equipment will be removed and the well plugged and abandoned. Any additional impacted soil encountered will be disposed of at the landfill.
