General Comment:

Engineering Integrity Inspection performed on September 28th, 2017 in response to initial form 19 spill report Doc #401410253 received by COGCC on 09/22/2017 that outlines: A fire occurred at the separator. Subsequently, seven (7) bbls of produced water and three (3) bbls of oil were released within containment; In addition, form 22 accident report doc #401411356 was received by COGCC on 09/22/2017. Details of Actions Required are located in the equipment section of this report. Photo's/ doc's uploaded can be accessed at end of report.

Type: Horizontal Heated Separator

5

Comment: Inspector observed (5) horizontal heated separators impacted by fire/ out of service on the south side of location. The units were disassembled with heating elements/ fire tubes removed from the housings. The equipment was discolored/ blackened due to fire. No Great Western or contract personnel were on site at the time of this field inspection.

Corrective Action: Provide COGCC Engineering Integrity Group with a detailed written description of the following:
 1) Detailed root cause analysis that resulted in this incident (include description of equipment failures, how the fire ignited and resulting spill occurred).
 2) Description of all equipment changes, repairs and replacements completed as a result of the fire/ spill.
 3) Measures being taken to prevent the problem from reoccurring; Documentation of procedures, policies and training developed to prevent reoccurrence.
