Cause of Spill (Check all that apply) Human Error Equipment Failure Historical-Unknown Other (specify) _____

Describe Incident & Root Cause (include specific equipment and point of failure)

The released water was immediately removed with a vac truck and returned to the flowback system. The ground surface was scraped with a blade. A root cause analysis has not been completed at this time. Rainy weather and site activity has delayed characterization of the extent of impacts and corrective actions are pending sample collection and lab analysis.

Describe measures taken to prevent the problem(s) from reoccurring:

The problem pipe fitting has been isolated from the system.

Volume of Soil Excavated (cubic yards): _____

Disposition of Excavated Soil (attach documentation) Offsite Disposal Onsite Treatment Other (specify) _____

Volume of Impacted Ground Water Removed (bbls): _____

Volume of Impacted Surface Water Removed (bbls): _____

REQUEST FOR CLOSURE

Spill/Release Reports should be closed when impacts have been remediated or when further investigation and corrective actions will take place under an approved Form 27.

Basis for Closure: Corrective Actions Completed (documentation attached)

Work proceeding under an approved Form 27
