General Comment:

This is a reclamation inspection. This is a shorter corrective action date because of the growth stage for Russian thistle and Kochia. Russian thistle and Kochia are considered weed waste and will spread onto adjacent lands.

Comment **This location is not in compliance with Reclamation rules. Rule 1002.c. states all stockpiled soils shall be protected from degradation due to contamination, compaction and, to the extent practicable, from wind and water erosion during drilling and production operations. Best management practices to prevent weed establishment and to maintain soil microbial activity shall be implemented.**

Topsoil stockpile has significant weed cover- Russian thistle and Kochia- with no perennial vegetation that would compete with the weedy vegetation and generally work to decrease weed growth. Refer to the attached inspection photos for more detail.

Corrective Action **Best management practices to prevent weed establishment shall be implemented. Control, manage, and prevent weedy, annual vegetation on all topsoil stockpiles by 10/26/2017. If reseeding is an option for long-term protection and stabilization of topsoil, then the next favorable seeding opportunity shall be conducted.**
