TRANSECT RESULTS OF DISTURBED AREA% \_\_\_\_\_

TRANSECT RESULTS OF REFERENCE AREA% \_\_\_\_\_

TOTAL % OF DESIRABLE VEGETATION COVER \_\_\_\_\_

VEGETATIVE COVER \_\_\_\_\_

Comment: **This location does not meet reclamation regulations; insufficient vegetative cover. Former well and battery location is predominantly exposed soil and unvegetated. Compaction concerns likely exist. Vegetation existing on location predominantly undesirable weedy plant species such as Tribulus terrestris (puncturevine). This location is not progressing towards reclamation requirements.**

Corrective Action:	Perform reclamation in accordance to COGCC 1000 series reclamation requirements and establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed. Revegetation activities shall be complete no later than 1/15/2018.	Date	01/15/2018

		Multi-Well Location	<input type="checkbox"/>

**COGCC Comments**

Comment	User	Date
Photo #6 shows inspector had tested the site for compaction concerns, and was only able to penetrate the first couple of inches of topsoil with relative ease when compared to soils in the adjacent reference areas (photo 7). Upon follow-up, once operator has performed the required reclamaaiton, inspector will sample the location to determine compliance with COGCC 1000 series reclamation requirements.	trujilloam	10/17/2017
