Hi Aaron,

The Sundry that was submitted to extend the pit closure requirement for the Hudson #1 (API #043-06226) was not approved. This pit is subject to NOAV #401263050 and Aus-Tex Exploration needs to submit a Form 27 (if not submitted already) and proceed with pit closure as required by the NOAV. As a result, the subject Sundry has been pushed back to draft.

If you have any questions, please give me a call.
Thank you,
John
