2 ☒ CA# 91007

Corrective Action: Confirm natural gas motor is equipped with quite design muffler or equivalent and muffler is properly installed and maintained in working order per Rule 802.f.

Date: 08/26/2017

Response: CA COMPLETED

Date of Completion: 07/31/2017

Operator Comment: In July a landowner complaint was received regarding the noise on this location. The Operations personnel then made necessary repairs to this muffler and hoses. Operations has returned to location on the 21st of August and has confirmed that the correct muffler is installed and all components are functioning properly. The muffler installed on this C 66 engin is a Arrow MUF-1-H muffler which is hospital grade muffler with a 30 - 35 db noise reduction rating. In reviewing the installation/owners manual there is no specifications for Service & Maintenance schedules for the muffler. In addition contact was made with Arrow Engine Co who states "The only thing I can say is Arrow does not put an expected life span on any of its mufflers or silencers due to varying applications, fuels, environment and load condtions." per Roger Dennison of Arrow Engine Co. See attached documents

COGCC Decision: Approved pending re-inspection

COGCC Representative: Follow up inspection to be completed.
