## OPERATOR COMMENTS AND SUBMITTAL

Comments    The distance from the completed portion of the proposed wellbore to the nearest completed portion of offset wellbore permitted or completed in the same formation was taken from the proposed CCRP Operating Inc. Salt Ranch Fee 208-1015H on the same wellpad. The distance was calculated using vertical separation (3D).

The distance from the proposed wellbore to nearest existing or proposed wellbore belonging to another operation, including plugged wells was measured to the producing Lion Creek 04-16H.

## Best Management Practices

<u>No</u>	<u>BMP/COA Type</u>	<u>Description</u>
1	Drilling/Completion Operations	Logging: One of the first wells drilled on the pad will be logged with open-hole Resistivity Log and Gamma Ray Log from the kick-off point into the surface casing. All wells on the pad will have a cement bond log with gamma-ray run on production casing (or on intermediate casing if production liner is run) into the surface casing. The horizontal portion of every well will be logged with a measured-while-drilling gamma-ray log. The Form 5, Completion Report, for each well on the pad will list all logs run and have those logs attached. The Form 5 for a well without open-hole logs shall clearly state "No open-hole logs were run" and shall clearly identify (by API#, well name & number) the well in which open-hole logs were run.
