INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

Form 19 (Document # 400891732) previously submitted. Initial action included shutting in the pipeline. Liquids were contained and impacted soil excavated. Excavated area confirmatory samples are clean; however, stockpile confirmatory samples indicate further remediation of the stockpile is required.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

Grab samples were collected from the excavation limits and analyzed for TPH, BTEX, EC, SAR, and pH. In addition, a sample was collected from the stockpile post treatment via soil shredding and chemical oxidation to confirm residual concentrations to be < Table 910-1.

Proposed Groundwater Sampling

☐ Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Proposed Surface Water Sampling

☐ Will surface water samples be collected as part of this investigation? (Number, analyses, and locations of samples):
