General Comment:[See link at end of report for path to downloadable pictures.](#)[This is a orphan well inspection with emphasis on critical maintenance and abandonment. No previous corrective actions performed, corrective actions are still required.](#)[With no current operator this well inspection included portions of May 2017 Flowline NTO to mark and inventory flowline risers. Due to location conditions and with no operator to provide assistance this inventory is informational only and may not identify all flowlines and risers.](#)

COGCC Comments

Comment	User	Date
Tasks will likely include access road repair, P&A of well, Electrical service equipment removal, flowline removal/abandonment, and site clean up. Pit on location may require impacted material removal, possible sampling and analysis? TBD by Enviro. Additional finding of (2) rig anchors will require locate and removal of all anchors. Possible removal of power pole and meter that were run to location. Initial reclamation work on access road and location will be needed when all other work is completed.	stjohnw	10/23/2017
