## INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

On February 12, 2014, a historic release was discovered during the removal of a buried produced water vessel at the Rupert 1, 2, 32-8 (API# 05-123-11064) tank battery. A Form 19 was submitted on June 27, 2014 and the COGCC assigned Spill Tracking Number 400635216. A topographic map of the site is included as Figure 1.

## **REMEDICATION SUMMARY**

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Monitored natural attenuation (MNA) will be the selected remediation strategy for the site beginning the first quarter 2017. Quarterly groundwater monitoring will continue until four consecutive quarters of monitoring data indicate BTEX concentrations are in compliance with the applicable COGCC Table 910-1 groundwater standards.
