General Comment:

On 10/26/2017 COGCC Environmental staff inspected spill number 401395060. Oil that was observed in the drainage bottom on previous inspection has been removed. The excavation, exposing the release point was still open. Salt staining was observed it may be native (from surface water) or from the spill. Background samples should address the salt staining observed. Ultimately the operator will be responsible for surface reclamation.
