1	<p>CPW has mapped swift fox habitats located in and near this proposed development.</p> <p>Therefore, CPW recommends that the operator (or its biologist) conduct an initial site visit to determine if there are larger (~8-inch) dens (for swift fox) in and near the site boundaries.</p> <p>If larger dens are present, and initial site disturbance will occur during the swift foxs denning season (April 1 through June 30), then CPW recommends that the operator contact us for swift fox survey protocol.</p> <p>CPW appreciates the collaboration, as we strive for responsible energy development while protecting sensitive habitats.</p> <p>Should the operator have any questions and/or request a site visit with CPW, please contact CPWs Northeast Region Energy Liaison (Brandon Marett) at (303) 291-7327.</p>	10/13/2017
