General Comment:

Counter #3 well hasn't produced since I have been with the COGCC almost 7 years. All the 2" valves are rusted in and cannot open valves. What are you going to do about this well. The well was supposed to get motor fixed and it was never done, and the NOAV was written off without re-checking the well to see if the work was done. So far nothing has been done but the trash hauled off. IS THIS WELL A TA WELL?
