Comments:

COGCC CONDUCTED A FOLLOW-UP INSPECTION ON OCTOBER 5, 2017. THE FOLLOWING OBSERVATIONS WERE MADE:

- Inspection doc. #682502392 documented that crop vegetation over the access road is significantly stunted when compared to the adjacent reference area (likely due to compaction concerns). Inspection required operator to perform additional reclamation work on the access road. Unable to find evidence that additional reclamation work had been conducted per the corrective actions. Original corrective action and corrective action date remains applicable.
- Perform reclamation on access road in accordance to COGCC 1000 series reclamation requirements and standards. To allow time for Noble to collaborate with the surface owner and determine mitigating measures that will allow reclamation work to be conducted in such a manner as to not interfere with agricultural activities or crop production, and to allow time for Noble to identify the issues hindering crop growth, all additional reclamation activities shall be completed no later than September 15th, 2017

Operator Comments:

NOBLE'S RESPONSE TO THE INSPECTION IS AS FOLLOWS:

The corn crop is still standing in this field, therefore, Noble has not been able to perform additional reclamation activities by the September 15th deadline. Noble will address potential compaction issues in the former access road once the crop is harvested.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
