TOTAL % OF DESIRABLE VEGETATION COVER _____

VEGETATIVE COVER _____

Comment:

Operator submitted resolution doc #401432312 indicating corrective actions have been addressed. Pipe riser equipment has been removed from the location. Access road appears to have been re-contoured/re-graded. Evidence that additional seeding at the location has occurred as well as the access road. This satisfies the requirements per the corrective actions. Reclamation in process. Continue to monitor and manage the location until site meets COGCC 1000 series reclamation standards and requirements. Upon achieving standards, submit a form 4 and a final reclamation inspection will be conducted.
