INITIAL SPILL/RELEASE REPORT

Initial Spill/Release Report Doc# 401463506

Initial Report Date: 11/17/2017 Date of Discovery: 11/15/2017 Spill Type: Recent Spill

Spill/Release Point Location:

Location of Spill/Release: QTRQTR NWSW SEC 17 TWP 7S RNG 94W MERIDIAN 6

Latitude: 39.436022 Longitude: -107.915555

Municipality (if within municipal boundaries): _____ County: GARFIELD

Reference Location:

Facility Type: FLOWLINE Facility/Location ID No _____
 No Existing Facility or Location ID No.
 Well API No. (Only if the reference facility is well) 05-045-18767

Fluid(s) Spilled/Released (please answer Yes/No):

Was one (1) barrel or more spilled outside of berms or secondary containment? Yes

Secondary containment, including walls & floor regardless of construction material, must be sufficiently impervious to contain any discharge from primary containment until cleanup occurs.

Were Five (5) barrels or more spilled? No

Estimated Total Spill Volume: use same ranges as others for values

Estimated Oil Spill Volume(bbl): 0 Estimated Condensate Spill Volume(bbl): Unknown

Estimated Flow Back Fluid Spill Volume(bbl): 0 Estimated Produced Water Spill Volume(bbl): Unknown

Estimated Other E&P Waste Spill Volume(bbl): 0 Estimated Drilling Fluid Spill Volume(bbl): 0

Specify: _____

Land Use:

Current Land Use: NON-CROP LAND Other(Specify): _____

Weather Condition: Cloudy 50

Surface Owner: FEE Other(Specify): _____

Check if impacted or threatened by spill/Release (please answer Yes/No to all that apply):

Waters of the State Residence/Occupied Structure Livestock Public Byway Surface Water Supply Area

As defined in COGCC 100-Series Rules

Describe what is known about the spill/release event (what happened -- including how it was stopped, contained, and recovered):

During a routine site visit, one of our technicians observed gas coming out of the pad surface between the wellheads and separators. The lease operator and production foreman were immediately notified. Once they arrived on site, they began pressure testing all flowlines between the wellheads and separators. Once they found the flowline that was leaking, it was immediately shut in. Assessment of impacted material is currently underway. All impacted soil and/or groundwater is being removed from the ground.

List Agencies and Other Parties Notified:

OTHER NOTIFICATIONS

<u>Date</u>	<u>Agency/Party</u>	<u>Contact</u>	<u>Phone</u>	<u>Response</u>
11/16/2017	CDPHE	Ann Nedrow	303-692-2709	Submitted an official report

COA Type

Description

	On that supplemental or on a subsequent one, provide lab results with sampling locations and description of the temporary well to be installed in the excavation area.
	When submitting the supplemental e-form 19, include a Figure that shows the french drain alignment, the location of the spill, the area excavated, the flow path from the french drain discharge to the retention pond (a BMP feature). Indicate on the figure the section of the French drain that is perforated and the depth of the drain at the spill location. Please indicate depth to GW as well. Describe the type of soil encountered during the excavation.
