Complaint

Comment:	<p>Well Number#: <u>Location #: 434375/434526</u></p> <p>Inspection Document #: <u>674200326/674200327</u></p> <p>Nature of complaint: <u>Noise/Odors</u></p> <p>Field Inspector Actions:</p> <p>On 11-13-2017, I was contacted by complaint specialist Megan Adamczyk in reference to several complaints received for 11-10-2017 thru 11-13-2017 by the COGCC about noise/odors occurring in the Erie area south of the Crestone Peak Resources, Waste Connection frac pad.</p> <p>On 10-13-2017 at approx 1400 hrs I performed a complete site inspection of the Waste Connection and Pratt location and the neighborhoods south of the locations. At the time of inspection, I observed 1 work over rig performing drill out operations on the waste connection location and 1 coil tubing unit performing drill out operations on the Pratt location for Crestone Peak Resources. I reviewed location records, which did not show any abnormal flow back operations at the time of the complaints. I also reviewed the 3rd party sound data and the town of Erie's sound data information which did not show any exceedance of noise levels.</p> <p>At the time of the inspection I observed closed tanks being used for the flow back process and a filed flare being used to flare off any VOCS at both location. At the time of the inspection all lighting on location appeared to be pointed toward the ground and center of location. As part of the inspection I checked the area of the complaints for odors and at the time of the inspection I did not detect any odors off location.</p> <p>Upon reviewing operation records Crestone had begun daylight operations at location which are 0700 hrs to 1900Hrs on 11-12-2017.</p> <p>All information reviewed and site inspection information were submitted to the COGCC for further review.</p> <p>No violations of COGCC rules were observed at the time of the inspection</p>
