CORRECTIVE ACTIONS:

1 CA# 107487

Corrective Action: Provide documentation as to the use of the frac tanks on location via field inspection report resolution (FIRR) form. This documentation should describe what the tanks are being used for, why they are on location, and how long they are expected to remain. If the tanks are not on location to facilitate a well on the well pad, they need to be removed by November 26, 2017.

Date: 11/02/2017

Response: CA COMPLETED

Date of Completion: 11/02/2017

The temporary tanks on location were used to support the completion of the Falcon Seaboard 11-90-12 #5. These tanks were used to aid in water storage needed for completion operations. The tanks have been released

Operator Comment: by SG for pick-up by the owner - an exact date of pick-up was not been provided by the owner of the tanks, however they were all gone as of 11/20. The tanks were used to facilitate completion operations of a well (Falcon Seaboard 11-90-12 #5) on a lease committed to the federal Bull Mountain Unit. The Hughes 11-90-26 #3 well pad is on a lease that is also committed to the federal Bull Mountain Unit. The Bull Mountain Unit is considered a single lease for production and operational purposes.
