Comment:

As requested by Barbara Westerdale, the updated plat that reflects the small shift in SHL is attached. The SHL was moved slightly to accommodate the rig better for safety reasons.

Top of producing zone footage calls are estimated and are based on being within the hardline and into our target production interval. When the well is completed the form 5A will detail the actual footage calls from the top of production zone.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
