Environmental**Spill/Remediation:**

Comment: COGCC Environmental Staff responded to the City of Greeley Rover Run Dog Park to investigate a suspected release of E&P Waste from an abandoned flowline. COGCC Environmental Staff met onsite with the City of Greeley Fire Department Personnel. Fire Department Personnel advised COGCC that a citizen had contacted the City of Greeley park staff on 11/21/2017 to report oil bubbling from the ground. Park staff were unable to locate the incident until the citizen reported the oil bubbling again on 11/29/2017 and park staff located the area of concern. SRC Energy agreed to excavate the area and reportedly completed the excavation on the morning of 11/30/2017. Greeley Fire Department contacted COGCC and COGCC personnel arrived onsite 11/30/2017 and observed an area that was recently excavated and backfilled with clean material. Oil impacted soil remained on the surface in the area of the excavation. COGCC contacted Noble Energy who indicated they would be responsible for remediation of the flowline release. Noble indicated that utility locates had been requested and excavation to investigate and remediate the release would commence on 12/5/2017.

Corrective Action: Operator has submitted Form 19 Initial Report. Form 19 Supplemental Report is due 12/9/2017.
