Comments:

Wexpro Company reseeded the approximate 3.7 acres of the interim reclamation of the WB Lasher 10 well pad, due to insufficient desirable vegetation. Seeding was completed in the Fall of 2017 by Powell Restoration. The location was drill seeded with crimped straw mulch and amendments were applied to increase chances of success.
Triganics was applied at a rate of 3500 lb/acre and 3-6-3 at a rate of 50 lbs/acre.
The seed supplier could not provide Shadscale, so Fourwing Saltbush was substituted.
Please see the attached seed tags and amendment information.
