CORRECTIVE ACTIIONS:

1 CA# 105671

Corrective Action:

Date: 01/15/2018

Perform reclamation in accordance to COGCC 1000 series reclamation requirements and establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of pre-disturbance or reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until Final Reclamation has passed. Revegetation activities shall be complete no later than 1/15/2018.

Response: CA COMPLETED

Date of Completion: 11/20/2017

Operator  
Comment:

The corrective action has been completed. See operator comment and submittal

COGCC Decision:

COGCC  
Representative:

#### OPERATOR COMMENT AND SUBMITTAL

Comment: Corrective action completed on 11/20/2017. Site was fenced to prevent cattle from damaging reclaimed area. Site was then deep cross ripped, drill seeded with sandy soil/native prairie mix, and straw mulched/crimped with certified seed free straw. The site will be inspected in Spring 2018 for necessary weed control and treated as necessary.  
Note - Site was originally prepped, seeded, and mulched in June 2017. However, the tenant for the surface placed his salt blocks at the site and his cattle ruined the reclamation effort. For this reason, it was necessary to fence the site.

I hereby certify that the statements made in this form are, to the best of my knowledge, true, correct, and complete.
