General Comment:

Follow-up inspection following pit #119478 NFA closure under REM 9846. Contaminated soils were remediated using H2O2 chemox until Table 910-1 compliant then backfilled. Pit has been backfilled and graded to level surface (pad is level, contouring not needed). No indications of residual petroleum contamination such as staining or odors.

Pit 119477 remains active. Pit is ~ 15x15x 2ft deep. Pit is netted, unlined, compacted, dry soil. Appears to be for emergency overflow from 100 bbl PW tank.

Fence and net debris from closed pit remains on location and must be recycled or properly disposed. 16x250 gallon empty H2O2 carboys staged along Baxter Pass road must be removed.

COGCC Comments

Comment	User	Date
Remove and dispose fence/net debris. Remove empty carboys from roadside.	spencers	12/04/2017
