## DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
Yes	SOILS	Area roughly 15' x 15' x 7'	excavation of impacted soils

## INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

During water vault removal it was determined that soil impacts were present. This was due to historical release of produced water and condensate from produced water vault. Impacted soils were excavated and disposed of at Waste Management North Weld Landfill

## PROPOSED SAMPLING PLAN

### Proposed Soil Sampling

Will soil samples be collected as part of this investigation? ( Number, type (grab/composite), analyses, and locations of samples ):

Soil samples were collected using a geoprope to collect at depths of 6-7 feet. 4 samples were collected around excavation area. Samples were analyzed for comparison to COGCC Table 910-1 standards.

### Proposed Groundwater Sampling

Will groundwater samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):

Groundwater samples were collected from location at depths of 7-8 feet. 4 samples were collected around excavation area. Samples were analyzed for comparison to COGCC Table 910-1 standards.

### Proposed Surface Water Sampling

Will surface water samples be collected as part of this investigation? ( Number, analyses, and locations of samples ):
