VEGETATIVE COVER _____

Comment: Previous inspections required operator to perform reclamation at the well location and access road leading around the well. Additional reclamation activities appear to have been conducted per the corrective action; well and access road appears to have been reseeded and crimped with straw for stabilization. This satisfies the corrective action. Continue to monitor and manage the location. Once COGCC 1000 series reclamation standards have been met, submit a form 4 and an inspection will be scheduled.
