- 2. Harvesters State 32C-16-M2**

Ladies and Gentlemen,

SRC Energy Inc. (SRC) is applying for the above permits to drill the captioned horizontal wells. Pursuant to Rule 317.r, you are provided notice of a wellbore lying within one hundred fifty (150) feet of the existing active well cited below. An operator will perform an anti-collision evaluation of all active (producing, shut in, or temporarily abandoned) offset wellbores that have the potential of being within 150 feet of a proposed well prior to drilling operations for the proposed well. Notice shall be given to all offset operators prior to drilling.

Additionally, pursuant to Rule 317.s, no portion of a proposed wellbore's treated interval shall be located within one hundred fifty (150) feet of an existing (producing, shut-in, or temporarily abandoned) or permitted oil and gas wellbore's treated interval belonging to another operator without the signed written consent of the operator of the encroached upon wellbore. As currently planned, the following well(s) operated by Noble Energy have treated intervals that lie within one hundred fifty (150) feet of the horizontal lateral of the captioned wells that SRC is proposing.

Well Name	Offset Well Name	Operator	DIR TPZ	Closest Distance (Productive Interval)	at MD	Closest Distance (Entire Well)	at MD
Harvesters State 4N-16C-M	Burbach 15-22	Noble	7590	127	8972	127	8972
Harvesters State 32C-16-M2	Burbach 15-23	Noble	7629	146	9378	146	9378

If Noble Energy is in agreement to waive Rule 317.s, please sign this consent form in the space provided below and return one original copy to the undersigned.

Sincerely,

Erin Ekblad
