COMMENTS:

Regarding the e-mail correspondence with Black Hills on May 8, 2017, Action Item #2 regarding Spill# 2221287.

In 2011, upon removal of the tank in that was present within the small pit (~10'x10'x8'), a sample was collected from the pit bottom to a depth of 12" below ground surface (bgs) and submitted to ALS for COGCC Table 910-1 thresholds. Soil did not contain any concentrations exceeding Table 910-1 standards and no remediation was necessary. No material was excavated or treated on-site, as there was no need due to results satisfy COGCC Table 910-1.

Form 19 submitted July 30, 2011 (Spill# 2221287) includes confirmation analytical showing soils satisfy COGCC Table 910-1, along with sample location map.

Confirmation data (ALS Lab Report # 1105413) is also attached to this Form 4 for reference.

Environmental	Based on review of information presented it appears that no further action is necessary at this time, and COGCC approves the closure request. However, should future conditions at the site indicate contaminant concentrations in soils exceeding COGCC standards or if ground water is found to be significantly impacted, then further investigation and/or remediation activities may be required at the site. Reclamation shall be in accordance to the 1000 Series Rules.	12/15/2017
Environmental	Black Hills sampled the bottom and walls of the excavation. Soil did not contain any concentrations exceeding Table 910-1 standards and no remediation was necessary.
