DOCUMENTS SUBMITTED Purpose of Submission: _____

RECLAMATION

INTERIM RECLAMATION

Interim Reclamation will commence approximately _____

Per Rule 1003.e.(3) operator shall submit Sundry Notice reporting interim reclamation is complete and site is ready for inspection when vegetation reaches 80% coverage.

Interim reclamation complete, site ready for inspection.

Per Rule 1003.e(3) describe interim reclamation procedure in Comments below or provide as an attachment and attach required location photographs.

Field inspection will be conducted to document Rule 1003.e. compliance

FINAL RECLAMATION

Final Reclamation will commence approximately _____

Per Rule 1004.c.(4) operator shall submit Sundry Notice reporting final reclamation is complete and site is ready for inspection when vegetation reaches 80% coverage.

Final reclamation complete, site ready for inspection. Per Rule 1004.c(4) describe final reclamation procedure in Comments below or provide as an attachment.

Field inspection will be conducted to document Rule 1004.c. compliance

- Beneficial Reuse of E&P Waste

COMMENTS:

As requested, Great Western ("GW") is submitting notice to COGCC that it will flare produced gas during flowback at the Raindance FD pad, however GW does not believe a Form 4 is required at this time. It is technically infeasible to sell the gas because there is no gas line. The produced gas will be controlled at >98% efficiency by on-site enclosed combustion devices (ECD). GW has estimated gas production to be approximately 3,000 Mscfd for the duration of the flowback. A representative gas analysis from GW's Marcus LD facility has been utilized to estimate emissions and demonstrate H2S composition.

The facility will be in compliance with the requirements of COGCC Rule 805.b.(1).

H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: 0 in ppm (parts per million) Date of Measurement or Sample Collection 11/04/2015

Description of Sample Point:

Representative analysis sampled from the wellhead at Great Western's Marcus LD facility.

Absolute Open Flow Potential 300000 in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: 700 FEET

Distance to nearest Federal, State, County, or municipal road or highway owned and principally maintained for public use: 700 FEET
