INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

During reclamation of the location historical impacts were discovered.

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

Confirmation soil samples will be collected to determine the final extents of impacts. Twenty one (21) soil samples were collected and analyzed for TPH-DRO, TPH-GRO, BTEX, and Naphthalene during initial excavation and site investigation activities.

Proposed Groundwater Sampling

Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Proposed Surface Water Sampling

Will surface water samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Additional Investigative Actions

Additional alternative investigative actions described in attached Site Investigation Plan (summary):

Further excavation and confirmation sampling is scheduled.

REMEDIAL ACTION PLAN

SOURCE REMOVAL SUMMARY

Describe how source is to be removed.

An initial excavation to remove source material occurred on December 11, 2017. Additional source removal is warranted and will be treated on location using a soil shredder and hydrogen peroxide.

REMEDIATION SUMMARY

Describe how remediation of existing impacts to soil and groundwater is to be accomplished (i.e. summarize remedial action plan). Provide a brief narrative description including: technical justification, schedule for implementation, estimated time to attain NFA status, plus plans and specifications for the selected remedial action technology.

Remediation of impacted soil will be completed using a soil shredder with hydrogen peroxide application. Treated soil will be sampled every 100 cubic yards and will be analyzed for TPH-DRO, TPH-GRO, BTEX, and Naphthalene. Confirmation soil samples will be collected from the sidewalls and base of the excavation.
