Photo 9: Photo taken from within the fenced remediation area, facing west. Previous inspections identified areas within the remediation area that remain bare and unvegetated, or predominantly undesirable weedy plant species and required additional reclamation to be performed. Photo shows bare and exposed areas. Unable to find evidence that additional reclamation activities have been conducted on these areas per the corrective action.

Photo 10: Photo taken from within the fenced remediation area, facing south. Previous inspections identified areas within the remediation area that remain bare and unvegetated, or predominantly undesirable weedy plant species and required additional reclamation to be performed. Photo shows areas where vegetation is predominantly undesirable weedy plant species. Unable to find evidence that additional reclamation activities have been conducted on these areas per the corrective action.

Photo 11: Photo taken from the access road, facing east. Photo shows area of access road that appears to have been regraded, seeded and crimped with straw for stabilization.
