Gentlemen:

Your attention is called to the several exhausted producers in the Kecta Field, Weld County, Colorado, which have been and, in some cases, are in the process of being plugged and abandoned.

No notification has been made to this office concerning this work, which is in violation of Rules 306 and 336 of the Rules and Regulations. The method of plugging wells in the State of Colorado, whether dry holes or abandoned producers, should have approval of this office before work is commenced.

The following is a list of wells which we have noted during a recent inspection of the field as having been either plugged or in the process of being plugged without approval by this office:

- | | |
|-----------------|------------------------|
| #3 Gillette | Section 4, T-9N, R-61W |
| #6 Gillette | " " " " |
| #1 Livengood | " " " " |
| #1 Steinko | Section 8, " " " " |
| #6 M&A Gillette | Section 8, " " " " |
| #6 M&A Gillette | " " " " |
| #1 Williamson | " " " " |

Enclosed for your convenience is a supply of CGCC Form 4, Notice of Intention to Abandon Well, and CGCC Form 6, Plugging Record. Form 6 will suffice for those wells already plugged; however, Form 4 should be sub-

July 1, 1939

mitted for those wells in the process of being plugged, and then Form 6 should be submitted following completion of the work.

In addition, it has also been noted that the wells still producing and operated by your company do not have well designations as required by Rule 311. This should be done as soon as possible.

Your cooperation in this matter will be appreciated. Should there be any questions, do not hesitate to contact this office.

Very truly yours,

OIL AND GAS CONSERVATION COMMISSION

F. J. Piro, Associate Petroleum Engineer
