Site Investigation and Remediation Workplan (Initial Form)

This form shall be submitted to the Director for approval prior to the initiation of site investigation and remediation activities. However, this shall not preclude the Operator from taking immediate action to protect public health or safety, the environment, wildlife, or livestock.

This Form 27 describes site conditions as currently understood by the Operator; approval of this Form 27 by COGCC is based on the site conditions accurately described herein; any changes in site conditions identified during or subsequent to the performance of the approved workplan may necessitate additional investigation or remediation which shall be described on a supplemental Form 27. This Form 27 is intended to provide basic information regarding the proposed site investigation and remediation actions, but the workplan may be more fully described in attached documentation.

Refer to Rules 340, 905, 906, 907, 908, 909, and 910

DESCRIPTION OF IMPACT

Impacted?	Impacted Media	Extent of Impact	How Determined
No	GROUNDWATER	None	Laboratory Analysis
No	SOILS	None	Laboratory Analysis

INITIAL ACTION SUMMARY

Description of initial action or emergency response measures take to abate, investigate, and/or remediate impacts associated with E&P Waste.

The location is being decommissioned and the produced water vaults were removed in the process. Samples were collected beneath the water vault to document soil and groundwater conditions. See attached documents for details and results

PROPOSED SAMPLING PLAN

Proposed Soil Sampling

☒ Will soil samples be collected as part of this investigation? (Number, type (grab/composite), analyses, and locations of samples):

A grab soil sample was collected from beneath the vault and submitted for laboratory analysis.

Proposed Groundwater Sampling

☒ Will groundwater samples be collected as part of this investigation? (Number, analyses, and locations of samples):

While pulling the vault, groundwater was encountered at a depth of 3.5' bgs. A groundwater sample was collected and submitted for laboratory analysis.

Proposed Surface Water Sampling

☒ Will surface water samples be collected as part of this investigation? (Number, analyses, and locations of samples):

Due to the shallow depth to groundwater and its presence in the vault's excavation, a groundwater sample was collected and analyzed for BTEX. The results came back as non-detect indicating the levels were well below the COGCC Table 910-1 concentrations for groundwater.

Additional Investigative Actions

☐ Additional alternative investigative actions described in attached Site Investigation Plan (summary):
