#### COMMENTS:

Update the TVD within the NIOBRARA and moving the lateral ~660' west to a new BHL of 998' FWL & 100' FSL. This new well plan shows the closest point in the planned production section of the lateral to the closest offset productive interval is never closer than the COGCC allowed 151'. The closest offset productive interval is over 600' away. Updated drilling info is attached.
