Complaint

Comment: Well Number#: Location #: 452217

Inspection Document #: 674200368

Complaint #s: 200444792

Nature of complaint: Odors/Noise

Field Inspector Actions:

On 12-18-2017, I was contacted by complaint specialist Megan Adamczyk in reference to a complaint received for noise on 12-17-2017 by the COGCC about odors occurring in the Erie area west of the Anadarko, Papa Jo location.

I contacted the complainant who indicated he had a strong odor at his residence which he believed was coming from the Anadarko drilling location which was located to the east of his home. The complaint questioned if Anadarko was utilizing at mud chiller on location.

On 12-19-2017 at approx 0730 hrs I performed a complete site inspection of the Papa Jo location and the neighborhoods around the location. At the time of inspection, I observed the Precision 564 drilling rig preparing to performing normal drilling operation on location. I contacted Jason Laub from Anadarko who indicated the rig was moved in on 12-17-2017 and began prepping to perform drilling operation on the Papa Jo wells. At the time of the complaint the Precision rig had not started drilling and the drilling mud was not in use at the time of the inspection the mud was not placed in the tanks until 12-18-2017 at approx. 1600 hrs. At the time of the inspection of the drilling rig Jason indicated Anadarko would be using odor solution for mitigation of odor on location. At the time of the inspection all lighting on location appeared to be pointed toward the ground and center of location

As part of the inspection prior to the rig inspection I checked the area of the complaints residence for odors and at the time of the inspection I did not detect any odors off location during my investigation.

All information reviewed and site inspection information were submitted to the COGCC for further review.

No violations of COGCC rules were observed at the time of the inspection
