DESCRIPTION

Provide a detailed description of the accident, problems, and cause (equipment failure, human error, etc.): actions taken to provide well control in detail):

On 12/24/2017, at approximately 2:30 p.m. MST a third party contract water hauler (CE) reported to XTO that the produced water tank on location had exploded. The CE had removed his hoses and grounding wire after loading produced water and was preparing to leave location when the event occurred. CE shut truck off, evacuated location on foot and contacted XTO. CE was transported to medical facility for evaluation and later released.

Access to the location was restricted, the well pad was isolated and the well was shut in. The 400 bbl produced water tank came to rest ~35 feet to the NW.

Approximately ten (10) bbls of produced water were released. Produced water was released to secondary containment area and a mist to the well pad, see Form 19 DOC 401495784.

Incident is currently under investigation. Additional information will be submitted in a subsequent Form 22.
