	Sound Barrier	
	Straw Bale	
	Containment	
	Wattle	
	55 gallon drum	

- 1) Construction site boundaries include all ground surface disturbances and approximately 10-15 feet beyond perimeter BMPs. Boundaries are subject to change at any time for pad expansion, maintenance and addition of BMP structures, or new access roads.
- 2) Site is located in a rangeland. Site will be stabilized after drilling operations and will remain until wells are plugged and abandoned.
- 3) Receiving Body of Water: Grizzly Creek 816' Northwest
- 4) Pad will be graded as close to pre-existing conditions as practicable and seeded to match the pre-disturbance vegetation type.
- 5) Pad dimensions are approximate.
