Subject: Bill Barrett Corporation Unplanned Sidetrack: Anschutz Williams 5-61-27-6457BSB (05-123-45726)

Ms. Burn,

As per our discussion, please see the e mail below detailing our plans to sidetrack the Anschutz Williams 5-61-27-6457BSB. Please let me know if you need any more information, thank you.

- While drilling our curve section, the directional team slid down rather than up for an entire stand. This error left us projected to land over 100' low of target and we made the decision to plug back and sidetrack to properly drill our geologic target.
- The total MD of the hole to be abandoned is 6277' MD.
- 9 5/8" surface casing is set at 843' MD.
- There is no fish in the hole.
- The proposed cement plug will run from 5122' to 5622' MD.
- Sidetrack KOP is 5122' MD.
- The objective formation for the sidetrack hole is the Niobrara formation, which is the same objective formation as the wellbore being abandoned.
- The PBHL of the sidetrack hole is the same as the wellbore being abandoned.

The "Application for Permit to Drill a Sidetrack Wellbore, Form 2" will be submitted end of next business day as per COGCC guidelines.

Matt Schwartz
