General Comment:

This is an orphan well inspection with emphasis on critical maintenance and possible abandonment. None of the previously identified corrective actions have been performed, corrective actions are still required. This inspection is to identify any items that require immediate action, to verify equipment, and identify possible task required for potential abandonment.

With no current operator this orphan well inspection included portions of May 2017 Flowline NTO to mark and inventory flowline risers. Due to location conditions and with no operator to provide assistance this inventory is informational only and may not identify all flowlines and risers.

See link at end of report for path to downloadable pictures.

Location

Lease Road:			
Type	Access		
comment:	Access road is washed out at drainage. Crossing continues to deteriorate.		
Corrective Action	L	Date:	

Overall Good: ☐

Signs/Marker:			
Type	WELLHEAD		
Comment:	Metal sign at wellhead.		
Corrective Action:		Date:	

Emergency Contact Number:			
Comment:	Orphan well. COGCC emergency contact information sticker placed on wellhead sign.

Access road is the largest area of concern. Road is washed out and will require repair to access disturbed area for plugging and reclamation work. Additionally lines have been exposed in the washed out area and some determination made as to the use/ownership of the exposed lines prior to road repair.	stjohnw	12/22/2017
If well is not returned to production tasks will likely include possible P&A, removal/abandonment of 2 flowlines, site clean up, and closing small pit on SE perimeter. Completion of final reclamation work on location and access road.
