H2S REPORTING

Data Fields in this section are intended to document Sample and Location Data associated with the collection of a Gas Sample that is submitted for Laboratory Analysis.

Gas Analysis Report must be attached.

H2S Concentration: 33.7 in ppm (parts per million) Date of Measurement or Sample Collection 12/05/2017

Description of Sample Point:

Three (3) gas phase samples were collected from this facility and the highest H2S concentration is listed above.

Sample 1: A gas phase sample was collected from the gas stream at the Razor 25 M, N Test Separator. The sample was then subjected to a gas analysis. The H2S concentration is 15.4 ppm for this sample. Sample: Razor 25 M, N Test Separator 171205

Sample 2: A gas phase sample was collected from the gas stream at the Razor 25 M, N Production Separator. The sample was then subjected to a gas analysis. The H2S concentration is 33.7 ppm for this sample. Sample: Razor 25 M, N Production Separator 171205

Sample 3: A gas phase sample was collected from the gas stream at the Razor 25 O, P Production Separator. The sample was then subjected to a gas analysis. The H2S concentration is 22.6 ppm for this sample. Sample: Razor 25 O, P Production Separator 171205

Absolute Open Flow Potential 858500 in CFPD (cubic feet per day)

Description of Release Potential and Duration (If flow is not open to the atmosphere, identify the duration in which the container or pipeline would likely be opened for servicing operations.):

The separators where these samples were collected are not open to the atmosphere and the potential for release would only occur during servicing operations. The typical duration of servicing operations is 2-4 hours.

Distance to nearest occupied residence, school, church, park, school bus stop, place of business, or other areas where the public could reasonably be expected to frequent: 5805 FEET
