Folks,

It was the COGCCs understanding that treatment of material within the bermed area immediately adjacent to the west side of the tank battery would begin in July 2017. The F27 (Document Number 401298580) was approved July 18, 2017 with conditions of approval (COAs) including:

- Monthly Supplemental F27s shall be submitted providing a project status including a diagram showing sampling locations, sample depths, laboratory analytical data tables and complete analytical reports.

Has WESCO initiated remedial activities?

Provide a status of this remediation.

Alex
