Subject: COA clarification

To: Dave Weinert <davew@kirkwoodcompanies.com>

The third COA that states, "NO treatment shall occur outside of this contained area." This allows for the use of a mixer out of the bermed area. NO soil is to be stored or staged out of the bermed area.

The third COA also states, "The Treatment/Containment area where land treatment is occurring shall be closed per COGCC 900 Series rules at the conclusion of the treatment period." The alternative to closing this treatment area would be to permit the area as a Central Exploration and Production Facility. This process is outlined in Rule 908.
