LITTLETON, COLORADO 80128-6901

October 4, 2017

SUBJECT: Action No. NWO-2017-01722-DEN, Extraction Oil and Gas Enright Pad

Mr. Rob Kremer
Apex Companies, LLC
1746 Cole Boulevard, Suite 265
Lakewood, Colorado 80401

Dear Mr. Kremer:

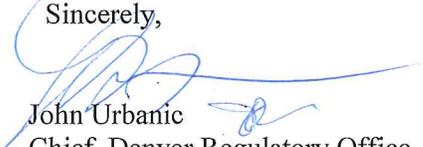

Reference is made to the aforementioned proposed project located at an approximate latitude of 40.307267 and longitude of -105.044231, in Weld County, Colorado. The work as described in your submittal will consist of the construction of an approximate 10-acre Enright wellpad for Extraction Oil & Gas operations.

This project has been reviewed in accordance with Section 404 of the Clean Water Act under which the U.S. Army Corps of Engineers regulates the discharge of dredge and fill material and certain excavation activities in waters of the United States (WoUS). WoUS includes ephemeral, intermittent and perennial streams, their surface connected wetlands and adjacent wetlands and certain lakes, ponds, drainage ditches and irrigation ditches that have a nexus to interstate commerce. Based on the information provided in the attached Figure 1, a Department of the Army (DA) permit will not be required for this activity.

Although a DA permit will not be required for this activity, this does not eliminate the requirements that other applicable federal, state, tribal, and local permits are obtained if needed. Please be advised that deviations from the original plans and specifications of this project could require additional authorization from this office.

If there are any questions please feel free to contact Brooke Davis at (303) 979-4120 or by e-mail at Brooke.A.Davis@usace.army.mil, and reference **Corps File No. NWO-2017-01722-DEN**.

Sincerely,

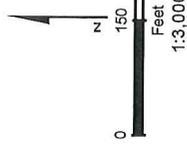

John Urbanic
Chief, Denver Regulatory Office
