Corrective Action:

Date: _____

Good Housekeeping:

Type

WEEDS

Comment: Operator has failed to control and manage Russian thistle, a weedy annual tumbleweed, to prevent weed debris and to prevent dispersing seeds onto adjacent lands. This is a short corrective action date since Russian thistle is already dried out and susceptible to breaking off from the main stem. Refer to the attached inspection photos for more detail.

Corrective Action: Comply with Rule 603.f. to control and manage weedy, annual vegetation to prevent weed debris and to prevent dispersing seeds onto adjacent lands.

 VEGETATIVE COVER _____

1003 f. Weeds Noxious weeds? _____

Comment This location is not in compliance with Rule 1003 standards. Operator has unmanaged Russian thistle (Salsola tragus-tumbleweed) throughout the perimeter and interim areas, which is considered, weed debris. Interim reclamation areas are not reflective of reference area vegetative levels. Reference area species include, but not limited to, Prairie sandreed (Calamovilfa longifolia), sand dropseed (Sporobolus cryptandrus) and blue grama (Bouteloua gracilis). Current interim vegetation consist mostly of Russian thistle.

Corrective Action Perform reclamation in accordance to Rule 1003. Establish vegetation with total perennial, non-invasive uniform plant cover of at least eighty (80) percent of reference area levels. Use a seed mixture requested by the surface owner, or a mixture prescribed by the local county NRCS. Ensure erosion controls are implemented to stabilize the seeded soil, and continue to monitor and manage this site until the location meets Rule 1003 standards. Interim reclamation activities shall be completed by April 30, 2018.
