To Whom it May Concern,

As we are applying for permits to create an injection well from our Elk Springs #4 (API 05-081-6837), it is our understanding that we do not require a Remedial Correction Plan as there is only one other producing well in the ¼ mile radius and it is not producing into the same formation that we will be injecting water into. The currently producing oil well is the Elk Springs #3 (API 05-081-06472) which is also operating by Lyster Oil Company.

Sincerely,

A handwritten signature in blue ink that reads "Amanda Stewart". The signature is written in a cursive, flowing style.

Amanda Stewart
Secretary
