Comment:

The surface string cement job includes 525 sacks of top out cement totaling to 1825 sacks of cement.

The GPS date of measurement is actual data of the existing well conductor location prior to the spud date.

No Open Hole Logs were run on this well. Triple Combination Logs were run on TR 313-21-597 (045-23339).

PBTD matches the CBL per Craig Burger.

The "depth driller" on the CBL reflects the Form 2 proposed depth. The actual TD is 9753' for this well.

I hereby certify all statements made in this form are, to the best of my knowledge, true, correct, and complete.
